

**CARVER STEAM**

## Carver STEAM Opens Doorways to New Opportunities

Carver STEAM is changing the culture to provide an innovative program that will replicate the highly successful Drew Charter School model in the East Lake community.

STEAM is an educational approach that encourages student inquiry, dialogue and critical thinking. Through Purpose Built Schools, Carver STEAM will offer a collaborative approach that includes experiential learning, extended days, an intensive focus on literacy and math, strong social and emotional support, and high quality teachers in every classroom.
